

FINANCIAL MANAGEMENT

The 3 levels of this course will be ideal for students interested in planning a career as an entrepreneur and/or pursuing post-secondary careers in Business Management, Commerce and Financial Administration.

FINANCIAL MANAGEMENT-INTRODUCTORY (5 credits)

Financial Management Introductory covers basic accounting procedures such as journalizing transactions and maintaining ledgers, the preparation of financial statements, and banking activities for small service and merchandising businesses. This is an ideal course for students pursuing a career in business, in post-secondary management/business or planning a career as an entrepreneur.

FINANCIAL MANAGEMENT - INTERMEDIATE (5 credits)

Students will extend their knowledge from Financial Management Introductory. Here, students will learn accounting concepts for a merchandising business and they will expand on their knowledge gained on fundamental accounting procedures. They will learn about preparing financial statements and banking statements for retail business.

FINANCIAL MANAGEMENT - ADVANCED (5 Credits)

Students will further extend their skills developed in Financial Management Intermediate. Students will learn how to apply principles of accounting to payroll, fixed assets, end of fiscal period adjustments, budgets, cost accounting, partnerships and corporations. They will also analyze financial statements. Excellent for students interested in pursuing post-secondary careers in Business Management, Commerce and Financial Administration.
