

# William Aberhart High School

## Grade 10 Technology Challenge

### D2L

D2L is used extensively at William Aberhart High School. We want to ensure that you are able to access this valuable tool.

1. Log into D2L.
2. You should be enrolled in a “Digital Citizenship” class for the 2015-2016 School Year. Open this class.
3. Navigate to the Quizzes section.
4. You will see a “D2L Usage survey”. Complete this quiz (which is actually a survey – your score does not matter).

### Google

All CBE students now have their own Google account under the “@educbe.ca” domain. This account is important as it will allow you to collaborate on and share documents with fellow CBE students and your teachers. A regular Google account will not be sufficient in all cases.

1. Log into your CBE google account. If you have never before done so, you will need to set up your account through [Gmail login](#) or through the Google home page.
  - a. Find out what your CBE gmail address is by following instructions at this link: [finding your gmail address](#).
  - b. Set up your gmail account through this link: [Accessing Gmail & Google Apps](#).
  - c. Log in through [Gmail login](#).
2. Follow the [Technology Survey](#) link and complete the form.

### Lynda.com

Lynda.com is a web service which provides professional-grade training videos for using wide variety of software. Topics include 3D animation, CAD, video, photography, and yes, how to use Gmail and Google Drive. You will have access to this valuable service for your entire time at Aberhart.

1. Open up your CBE gmail account. You should see an invitation from a website called “Lynda.com”.
2. Click the link in the invitation, and follow the instructions to set up your Lynda.com website.

### Note

If you are unable to follow the links in this document while on the website, download it to your computer and open it up using your regular PDF browser.
